

Anthropological Literature is a bibliographic index to articles in journals and edited works received by the Tozzer Library, the anthropology library of Harvard University, as well as selected online and open access journals. The e-resource contains more than **650,000** records dating from the early 19th century to the present with **10,000** new records added each year, on a monthly basis.

Journals and monographic series currently indexed in the **Anthropological Literature** e-resource

Current: January 1, 2017

The following list contains journals that in the past may have been indexed as monographic series, for example, *Quaternary Science Reviews*, *Quaternaria Nova* and *Plains Anthropologist*. In the e-resource, either the journal title or the title of the individual monograph may appear in a search by title. The user should try both titles.

The following list is for 687 **current** titles only. It does not include the names of numerous journals that have ceased publication or for which indexing has ceased. The e-resource does include the articles from journals and series that have ceased publication, and the older articles of some journals not indexed currently.
